State: Minas Gerais
Region: Mantiqueira, South Minas
Altitude: 1330m
Variety: Yellow Catucaí
Processing: Natural
Farmer: Luis Carlos Borges
Screen size: 16+
Moisture: Moisture: _____ %

Extremely clean coffee. Chocolate, caramel, brown sugar and hints of vanilla pudding.

Luiz Carlos is a member of APAS - The Alto da Serra Producers' Association. Founded in 1996 by a group of small producers, their aim is to improve their production conditions and quality. The producer utilizes familiar agriculture system, increasing the quality of his coffee in a sustainable way.

Mantiqueira has an ideal micro-climate: rainy during summer and dry during ripeness and harvesting periods. The mountainous area inhibits the use of machines, so coffee is selectively hand-picked.
